

DAILY SCRUM MEETING MINUTES

TEAM 7 - UNSUPERVISED LEARNING

Project Name: Movie Recommendation System

Meeting Purpose: Regular Check up on Progress

Place: Google Meet

Date: 20/04/2022

Start: 8:00 PM CAT

End: 8:30 PM CAT

Attendees

Name	Status
Ikechukwu Okerenwogba(Team Lead)	Present
Titus Wanjohi	Present
Teddy Waweru	Present
Jacqueline Wang'ombe	Absent with Apology

Agenda & Notes

Topic	Brief Description	Owner
Arrival	Check in with each other	Team
Target of the week	Make at least one Kaggle submission by 22 nd April	Team
Delegation of roles	The team discussed on splitting the tasks as follows: Building a Collaborative filtering system – Teddy & Titus Building a Content based filtering system – Ike & Jacqueline	Team
EDA Discussion	The team discussed on the data quality received for the task, primarily on the null values in some of the .csv's. For the imdb.csv, the data could be obtained by further web scraping, but only to improve an already working model. For now, the data would have to be excluded from the data due to the numerous null values it contains.	Team
Model Selection	Team decided to follow the basic step procedure provided in the sprint's docs to develop the initial model & build from there.	Ike

Actions

Action	Platform	Person	Due Date
Collaborative Recommender System	Kaggle	Teddy, Titus	22/04/22
Content based Recommender System	Kaggle	Jacqueline, Ike	22/04/22
